1. Registration function:

1. Open https://zyro.com/ -> User is on homepage

2. Click on JOIN ZYRO button on right hand side -> page https://zyro.com/signup opens up, possible options to join zyro.com are listed:

   - Continue with Google

   - Continue with Twitter

   - Continue with Facebook

   - Continue with your email address

3. Click on Continue with your email address -> form with two input fields opens up:

   - Email address

   - Password

4. Enter valid email address and password according requirements -> no errors are displayed

5. Click on Create account -> account is created and user is redirected to page https://zyro.com/wizard. Also the message that email address has to be confirmed is displayed on the top, but it is possible to see all functionalities of website creation wizard.

Note: *if I click on zyro logo then I am redirected to homepage, but still the buttons SigIn/JOIN ZYRO are displayed, so the user might be confused that he/she is logged out. NO identification that status form anonymous to logged in has changed.*

2. Registration with the same email address is not possible

1. Open https://zyro.com/ -> User is on homepage

2. Click on JOIN ZYRO button on right hand side -> page https://zyro.com/signup opens up, possible options to join zyro.com are listed:

   3. Continue with Google

   4. Continue with Twitter

   5. Continue with Facebook

   6. Continue with your email address

3. Click on Continue with your email address -> form with two input fields opens up:

   1. Email address

   2. Password

4. Enter email address you have already registered before -> error that email address is already used is displayed and there is suggestion for user to sign in.

5. Click on Sign in on error message -> page https://zyro.com/signin opens up. Form with two input fields opens up:

    1. Email address
    2. Password

6. Enter the same email address and password -> user is logged in.

3. Buy Zyro plan

1. Open https://zyro.com/ -> User is on homepage

2. Click on Pricing in main navigation -> All possible plans are visible

3. Click on Select for any of the plan -> Next page with possibility to choose subscription period opens up. One of the period is already preselected.

4. Choose the subscription period or click Continue to payment -> User is asked to sign up or sign in.

5. Click on Sign in -> Form with two input field opens up.

6. Enter your email address and password -> Page that user has to choose payment type opens up. Three possible payment options are displayed. Order summary is displayed on right hand side.

7. Choose Visa -> Form to fill in opens ups:

    1. Name on card
    2. Card number
    3. Expire date
    4. CVC code

8. Fill in your data and click on pay now -> I assume that confirmation page should be open and the message that payment was successfully is displayed. (Not possible to test till the end as I do not have testing credit card or any other payment accounts, but this user flows in my point of view is one of the crucial one on zyro.com).
